Aspiring Software Developer

I'm a web developer and data analyst, graduated from DUT in 2022, with hands-on experience in building websites. Formerly an IT Technician, I developed strong troubleshooting and network maintenance skills. Currently working as a call center agent for TalkTalk UK, enhancing my communication and client engagement abilities.

EDUCATION & CERTIFICATIONS

Tertiary Qualifications

Bachelor's Degree in Information and Communication Technology – Durban University of Technology – 2022

Certifications

- Introduction to Cybersecurity (Cisco)
- Introduction to Packet Tracer (Cisco)
- Data Analytics Essentials (Cisco)
- Introduction to Data Science (Cisco)
- FreeCodeCamy Web Development (Cisco)

TOOLS & TECHNOLOGIES

- Programming languages: Python, JavaScript
- Databases: MongoDB, SQL
- Web development frameworks: React, Node.js, Express
- Web development: HTML, CSS, Tailwind CSS, Bootstrap (basics)
- Cybersecurity: Introduction to Cybersecurity (Cisco)
- Data analysis tools: Microsoft Excel, Tableau, Power BI

AWARDS & HONORS

- Top Achiever in Physical Sciences at Sinolwazi High School (Grade 12)
- Top Achiever in Mathematics at Sinolwazi High Scholl (Grade 12)

PROFESSIONAL SOLO PROJECTS

Agent Trainer | Call Center Simulation & Coaching Tool | Full Stack.

[View Website](#)

Technologies:

HTML, CSS, JavaScript, Embedded JS, Node JS, Express, Tailwind CSS JWT, Node Mailer, Gemini API (LLM), Web Speech API (Voice)

Overview

Agent Trainer is a full-stack web application designed to simulate customer interactions for call center agents. It was built out of a personal need to improve customer service performance and confidence in high-pressure environments, especially for agents facing language barriers or accent-related challenges.

Key features include:

1. User-friendly interface
2. **AI-Powered Customer Simulation:** Uses Gemini API to simulate realistic customer chats and voice conversations.
3. **Voice & Chat Modes:** Allows agents to practice using either text or speech, mirroring real call center conditions.
4. **Dynamic Feedback System:** AI marks agent responses and provides real-time feedback based on customer service principles.
5. **Trainer Dashboard:** Enables team leaders to monitor performance and access call logs for personalized coaching
6. **Low-resource, High-impact Solution:** Developed independently under time constraints using free-tier tools and open APIs.

Ekhaya Smart Scholars Online Applications | Part 2 Application system | Full Stack.

[View Website](#)

Technologies:

HTML, CSS, JavaScript, Embedded JS, Node JS, Express, MongoDB, Tailwind CSS JWT, Node Mailer

Overview:

Developed a full-stack web application similar to Esgela Online Applications, with additional features such as a contact us section and subscriber functionality.

Key Features:

1. User-friendly interface with a similar UI to Esgela Online Applications
2. Secure authentication with JWT
3. Admin dashboard for application management
4. Automated email notifications using Node Mailer
5. Contact us section that sends emails to both admin and a confirmation to the sender
6. Subscriber button that adds users to the database and sends a confirmation email
7. Team section showcasing team members

Responsibilities:

This project serves as a learning curve, with new skills and ideas implemented after thorough research and understanding. The development process prioritizes:

1. Designed and developed the application's UI/UX
2. Implemented secure authentication and authorization using JWT
3. Integrated Node Mailer for automated email notifications
4. Integrated Node Mailer for automated email notifications
5. Developed the contact us and subscriber functionality
6. Managed the application's database using MongoDB

Esgela Online Applications | Part 1 Application system | Full Stack.

[View Website](#)

Technologies:

HTML, CSS, JavaScript, Embedded JS, Node JS, Express, MongoDB, Tailwind CSS JWT, Node Mailer

Overview

This online platform streamlines student application management, enabling users to submit forms and receive a unique 8digit student number starting with “24” for secure login. Users can access their accounts using either their ID or Student Number, paired with a password, providing flexibility and convenience.

Key features include:

1. User-friendly interface
2. Secure authentication with JWT
3. Admin dashboard for application management
4. Automated email notifications using Node Mailer

Esgela Online Applications | Learning Portal | Full Stack.

[View Website](#)

Overview

Designed as the second phase of the Esgela platform, this React-based portal was intended to provide accepted students with access to hands-on coding lessons (starting with HTML via AceEditor), real-time progress tracking, and a personalized dashboard. The system would link directly to the existing application database, automatically generating secure login credentials upon admin approval and sending them via email. Development was paused due to a shift in focus toward the Agent Trainer project and increased work demands, but the portal remains an important next step in Esgela’s mission to make technical education accessible in underserved communities.

Sdima Masela

Position/Relationship: Senior Clerk at Tekwini Junior Secondary School / Colleague

Contact Information: 073 669 7630

Description:

As a Senior Clerk at Tekwini JSS, Sdima Masela manages administrative operations and oversees technical support within the school. Her role includes coordinating office tasks, guiding junior staff, and ensuring a smooth workflow across departments. She also monitors and evaluates the delivery of technical assistance to educators, helping to create a more responsive and efficient learning environment. As a colleague, Sdima is familiar with my professional conduct, teamwork, and adaptability within an educational setting.

Zigcine Rubele

Position/Relationship: Close Friend and Volunteer Collaborator

Contact Information: ziginerubela1@gmail.com | +27 81 832 5614

Description:

Zigcine Rubele is a close friend who has actively contributed to my volunteer work and community-driven projects. She has supported initiatives such as the Esgela Program and is well-acquainted with my work ethic, reliability, and vision. Her involvement gives her a strong understanding of my leadership qualities, organizational abilities, and unwavering commitment to uplifting others through technology and education.
